Education

Bachelor of Computer Applications (BCA)

Graphic Era Hill University

August 2024 - June 2027

CGPA: 7.46

Experience

Full Stack Developer — TBI Incubated Startup, Graphic Era Hill University

- Contributed to the development of web applications using the **MERN stack (MongoDB, Express.js, React.js, Node.js)**.
- Developed and integrated **RESTful APIs** for core application features.
- Worked on **MongoDB database design, CRUD operations, and data management**.
- Collaborated with team members on **feature development, testing, debugging, and deployment**.
- Participated in **requirement analysis, feature planning, and product enhancement**.
- Applied full-stack development skills to solve **real-world application requirements** and build scalable solutions.

Projects

AI Knowledge Base | React.js, Node.js, Express.js, MongoDB

- Developed a full-stack knowledge management platform for **creating, organizing, searching, and retrieving structured information**.
- Designed and implemented **RESTful APIs** using Node.js and Express.js for managing knowledge-base resources.
- Built a modular **React.js frontend** with reusable components, dynamic data rendering, and responsive UI.
- Integrated MongoDB for structured data storage and implemented **CRUD operations** for knowledge-base content.
- Integrated frontend and backend through REST APIs for efficient **data exchange and application workflows**.
- Implemented request validation and error handling to improve application reliability and maintainability.

E-Commerce Website | React.js, Node.js, Express.js, MongoDB

- Developed a full-stack e-commerce application supporting **product browsing, shopping cart management, user management, and order operations**.
- Designed and implemented **RESTful APIs** using Node.js and Express.js for products, users, cart, and order-related functionality.
- Designed MongoDB data models for managing **products, users, and orders** with complete CRUD operations.
- Built a responsive **React.js frontend** using reusable components and dynamic data rendering.
- Integrated frontend components with backend APIs for **product retrieval, cart operations, and application data management**.
- Implemented form handling, validation, and error handling across key application workflows.

Complaint Management System | Node.js, Express.js, MongoDB, HTML, CSS, JavaScript

- Developed a full-stack complaint management system for **registering, tracking, updating, and managing complaints**.
- Designed RESTful APIs using Node.js and Express.js for complete **CRUD operations**.
- Integrated MongoDB for persistent storage and management of **complaint records and status information**.
- Implemented complaint status tracking and backend request handling for efficient workflow management.
- Developed a responsive frontend using **HTML, CSS, and JavaScript**.
- Connected frontend interfaces with backend APIs to create an **end-to-end complaint submission and tracking workflow**.

Technical Skills

Languages: Java (DSA), JavaScript (ES6+), C, C++, SQL

Frontend: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend & Database: Node.js, Express.js, REST API Development, MongoDB, MySQL

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Software Engineering, DBMS, Operating Systems

Leadership & Awards

- Active member of college technical clubs and participated in various **hackathons and coding events**.
- Completed multiple coding challenges and mini projects to enhance **problem-solving and development skills**.

Courses & Certifications

- Java Programming Masterclass** — Udemy (Instructor: Tim Buchalka) (2025).
- MERN Stack Development** — Scaler (2026)

Relevant Coursework

- Data Structures and Algorithms
- Object-Oriented Programming
- DBMS & Relational Databases
- Database Management Systems
- Software Engineering
- Data Communication & Networks
- Foundations of Artificial Intelligence
- Operating Systems
- Big Data Analytics
